

## MANURE DEODORIZER

(natural enzyme with Yucca Schidigara)

Combines the enzymatic action of the Odor Eliminator (ROE) with yucca schidigara. RMD will greatly reduce natural odors and gases such as ammonia, amines, mercaptans and sulfides as well as reduce solids to a liquid in pits, lagoons and slurry tanks. RMD is not a perfume or masking agent. Safe, non-toxic and biodegradable.

TESTED AND PROVEN EFFECTIVE FOR:

LIVESTOCK: All animal confinement buildings, dairies, nurseries and feedlots.

MANURE STORAGE: Deep pits, tanks and lagoons

### DIRECTIONS FOR USE

Hog or Dairy Confinements: Use 1 gallon RMD per 25,000/50,000 gallons of manure (depending on the severity of odors and solids). Mix each gallon of RMD with 5 to 10 gallons of water, which will give better dispersion.

For slurry tanks and lagoons: Use same ration as above, and apply to fill point, allowing RMD to come into the tank or lagoon with manure flow.

For flush system in confinement buildings: Add the diluted RMD mixture directly to charge water.

For odor control in feedlots, pens or stalls, manure piles, etc.: Use a dilution ratio of 1:100 – 1:500, and spray over surface.

RMD is a concentrated product. Shake contents before using. Use goggles and gloves when opening and mixing.

Formula to determine the gallon capacity of any pit, tank or lagoon; length x width x depth x 7.5 = capacity in gallons. Dilute each gallon of RMD into 4-5 gallons of water. THE GREATER THE DISPERSION OF THE DILUTED RMD MIXTURE THE BETTER THE RESULTS.

ROEBIC LABORATORIES, INC.

# MANURE DEODORIZER

(natural enzyme with Yucca Schidigara)

## Features

Reduces manure odors in livestock buildings, waste water lagoons and when spreading manure on fields

Reduces ammonia, sulfide, amine and mercaptan odors

Improves manure liquidity

Action not affected by disinfectants, chlorine, antibiotics or trace minerals

Retains nutrient values

Non-toxic formulation

Natural enzymatic action plus Yucca Schidigara

Bacteria free

100% safe around humans

100% safe around animals

100% safe for the environment

Not a perfume or masking agent

Liquid additive

## Benefits

No neighbor complaints. Improved air quality for employees and animals.

Easier breathing for livestock and employees.

Reduced agitation time. More manure spread on fields.

No additional costs for starting or re-starting bacterial activity in pit or lagoon.

Lowers fertilizer costs.

Safe for all applications.

Quick biodegrading process.

No contamination.

No health concerns.

Less stress on livestock. Faster weight gain. Less medication.

No pollution concerns.

No cover-up smells

Easy to apply.  
Economical to use.
